#### **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 54, 55, 56 and 58 are rejected under 35 U.S.C. 102(b) as being anticipated by Yu '699. Yu discloses a method for removing material from a microelectronic substrate, comprising: engaging the microelectronic substrate with a planarizing medium, which includes a polishing pad; moving at least one of a first part of the microelectronic substrate and the planarizing medium relative to the other at a first rate; moving at least one of a second part of the microelectronic substrate and the planarizing medium inwardly relative to the other at a second rate less than the first rate; removing material from the first and second parts of the microelectronic substrate at approximately equal rates (or uniform rates) by biasing the first part of the microelectronic substrate against the planarizing medium with a first membrane portion having a first thickness and biasing the second part of the microelectronic substrate against the planarizing medium with a second membrane portion having a second thickness greater than the first thickness (column 2, lines 60-63); the second annular part of the microelectronic substrate positioned radially inwardly from the first annular part of the microelectronic substrate; the membrane has a first surface facing toward the microelectronic substrate and a second surface facing generally opposite the first surface (Fig. 7; and column 3, lines 4-22), and wherein biasing the microelectronic substrate against the planarizing medium includes biasing a generally flat support member against the second surface of the membrane.

Art Unit: 3723

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 59 rejected under 35 U.S.C. 103(a) as being unpatentable over Yu in view of Walker '557. Yu does not specifically disclose a planarizing medium that includes advancing the polishing pad from a supply roller to a take-up roller. Walker discloses the use of a planarizing medium that includes advancing the polishing pad from a supply roller to a take-up roller so as to move the used portion of the pad away from the planarizing zone thus providing for a clean pad during the planarizing process. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have used a take-up roller in the apparatus of Yu as taught by Walker so as to move the used portion of the pad away from the planarizing zone thus providing for a clean pad during the planarizing process.

#### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alvin J Grant whose telephone number is (703) 305-3315. The examiner can normally be reached on Mon-Fri 8:00-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph J Hail can be reached on (703) 308-2687. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9302 for regular communications and (703) 872-9303 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308/1184.
